IN THE CLAIMS:

Please rewrite claims 9 and 13-16, as shown below in the detailed listing of all claims which were, or are, in the application:

Claims 1-8 (Canceled)

1 ~~9~~. (Currently amended) ~~An apparatus~~ A test card comprising at least one planar surface wherein at least two compartments are made and defined by a partition comprising a film, the compartments creating a space which makes it possible to displace at least two liquid samples independently of one another, the compartments comprising at least two different types of grooves:

- at least one deep groove capable of partitioning samples from one another, the depth and the width of the deep groove in relation to the partition being such that capillary action of a sample is not enabled, and

- at least two shallow grooves, each of the shallow grooves being capable of receiving one of the samples, respectively, the depth of shallow grooves in relation to the partition being such that capillary action of the sample is enabled, each shallow groove being adjacent to the deep groove, along the entire length of said

deep groove, wherein said test card is adapted for analysis of chemical, biochemical or biological analytes.

Claims 10-12 (Canceled)

2 ~~14~~. (Currently amended) The apparatus test card of claim ~~13~~,¹
wherein a deep groove is positioned between two shallow grooves.

3 ~~14~~. (Currently amended) The apparatus test card of claim ~~13~~,²
wherein the two shallow grooves meet at one of the ends of the deep
groove to create a reaction zone there, where the two liquid
samples may be brought together.

4 ~~15~~. (Currently amended) The apparatus test card of claim ~~14~~,³
wherein the distance between the reaction zone and the partition is
such that capillary action is enabled.

5 ~~16~~. (Currently amended) The apparatus test card of claim ~~14~~,³
wherein the distance between the reaction zone and the partition is
such that capillary action is not enabled.
